   Together you can plant 8 trees per hour. What is the greatest number
   of hours that you and your friend would need to plant at most 40 trees?

22. Suppose the physics club is going on a field trip. Members will be riding

   people will be going on the field trip. What is the least number of vans
   needed to make the trip?

   What is the maximum number of stamps that you can buy with $3.84?

24. The Garcias are putting a brick border along one edge of their flower
   garden. The flower garden is no more than 31 ft long. If each brick is
   6 in. long, what is the greatest number of bricks needed?

25. Janet needs to travel 275 mi for a conference. She needs to be at the
   conference in no more than 5.5 h. What is the slowest average speed
