

Name: _____ # _____ HR: _____ Due Date: _____

Name Tags

Name tags appear on each desk in the class where Meghan, Joseph, Vianna, and Anthony sit next to one another in a row. What are the different possible arrangements for the order of their name tags? Have you found ALL possibilities? How would the answer change if Meghan and Anthony's name tags were arranged so that they touch only one other classmates? In your explanation please include either a picture or chart of your findings.
